

PRIYA SHARMA

Fresher — Backend Developer

priya.sharma@email.com | +91 97654 32109 | Bangalore, India | github.com/priyasharma-dev

OBJECTIVE

Motivated Computer Science graduate seeking a Backend Developer role. Strong foundation in Python programming, SQL databases, and REST API development through academic projects. Quick learner with hands-on experience in Git version control and basic Docker containerization. Eager to contribute to a dynamic engineering team and grow technical skills in a professional environment.

EDUCATION

B.E — Computer Science Engineering

Visvesvaraya Technological University, Belagavi | 2020 – 2024 | CGPA: 8.4 / 10

Pre-University (12th Science — PCMB)

Sri Chaitanya PU College, Bangalore | 2018 – 2020 | 92%

INTERNSHIP

Python Backend Intern

CodeBase Technologies, Bangalore | June 2023 – August 2023 (3 months)

- Built REST API endpoints using Python Flask for an inventory management system
- Wrote SQL queries to fetch and update product data from MySQL database
- Used Git for version control and participated in weekly code review sessions
- Learned Docker basics and containerized the Flask application for deployment

ACADEMIC PROJECTS

Student Result Management System — Python + SQL + Flask

- Built a web application to manage student records, marks entry, and result generation
- Designed normalized SQL database schema with student, subject, and marks tables
- Created REST APIs using Flask for CRUD operations on student data
- Implemented user authentication with session management

Library Management System — Python + SQLite + Git

- Developed console-based library system for book issue, return, and fine calculation
- Used SQLite for persistent data storage with Python sqlite3 module
- Maintained codebase using Git with proper commit messages and branching

Weather Dashboard — Python + REST API + JSON

- Fetches real-time weather data using OpenWeatherMap REST API
- Parsed JSON responses and displayed formatted weather information
- Implemented basic error handling for API failures and invalid inputs

SKILLS

Python — 2 years

REST APIs — 1 year

Docker — 6 months

Linux — 1 year

SQL — 2 years

Git — 2 years

JavaScript — 1 year

Agile — 6 months

CERTIFICATIONS & COURSES

- Python for Everybody — Coursera (University of Michigan) — 2023

- SQL Bootcamp — Udemy — 2022
- Git & GitHub Complete Guide — Udemy — 2023
- Introduction to Docker — Docker Official Training — 2023

ACHIEVEMENTS

- 1st Place — Department Hackathon 2023 (Student Result System project)
- Best Project Award — Final Year Project Exhibition 2024
- Top 10% in VTU Semester Examinations — 2021, 2022, 2023
